

In the preamble, a variable `note` is defined, used as a switch to control comments display.

To change the behavior, assign anything but 1 to `note` (nothing is fine...). See document tree. If you do it at the top of the document, no comment will be shown in the whole doc.

A little drawback of this solution : hidden paragraphs are replaced by blank lines in the uncommented document.

A « productivity » tip : to quickly switch between `doc_view/tree_view`, insert a keyboard shortcut in your « `my-init-texmacs.scm` ». In my own file : ("`C-!`" (toggle-preamble))

`text with comments`

Normal text. blah blah blah ... **This is a comment inside the paragraph...** Normal text again.

A normal paragraph : Duis eni nisi cras rhoncus mi, nec. Velit curabitur erat vel porta elit. Mollis justo commodo tellus massa diam, taciti tristique lacus a mattis. A litora nisl, aliquam tempor, dui. Auctor, sociosqu curae.

hidden paragraphs :

Duis eni nisi cras rhoncus mi, nec.

$$a x^2 + b x + c = 0 \Rightarrow x = \frac{-b \pm \sqrt{b^2 - 4 a c}}{2 a}$$

Velit curabitur erat vel porta elit. Mollis justo commodo tellus massa diam, taciti tristique lacus a mattis. A litora nisl, aliquam tempor, dui. Auctor, sociosqu curae.

Another normal paragraph : Duis eni nisi cras rhoncus mi, nec. Velit curabitur erat vel porta elit. Mollis justo commodo tellus massa diam, taciti tristique lacus a mattis. A litora nisl, aliquam tempor, dui. Auctor, sociosqu curae.

`Same text without displayed comments : note assigned to nil`

Normal text. blah blah blah ... Normal text again.

A normal paragraph : Duis eni nisi cras rhoncus mi, nec. Velit curabitur erat vel porta elit. Mollis justo commodo tellus massa diam, taciti tristique lacus a mattis. A litora nisl, aliquam tempor, dui. Auctor, sociosqu curae.

Another normal paragraph : Duis eni nisi cras rhoncus mi, nec. Velit curabitur erat vel porta elit. Mollis justo commodo tellus massa diam, taciti tristique lacus a mattis. A litora nisl, aliquam tempor, dui. Auctor, sociosqu curae.
