

Chapter 1

A test of footnotes

Footnotes have worked for me in TeXmacs before[?], but are now[?] producing `<error|bad set binding>` before the text of each footnote. I just did a cvs update and then a “make install”, but it still looks the same.

1.1. `<error|bad set binding>`In 1.0.5

1.2. `<error|bad set binding>`In the CVS version of 1.0.6
